- Created APIs with Salesforce/IBM.

01/2015 to 01/2016 **Web Developer**

United Way Greater Toronto – *Toronto, ON*

- Worked within an in-house CMS to deliver websites and web applications related to UWT's website including designing and coding Corporate Partnership Reports, building fundraiser applications, and developing online aspects of UWT marketing projects.
- Wrote several add-on JavaScript applications to bypass certain CMS restrictions.

- Worked on delivering responsive, AODA compliant website projects.

EDUCATION

Associate of Applied Science: Computer Programming Analyst
George Brown College - *Toronto, ON*

VOLUNTEER

Volunteer, WordPress Developer - Project United CityAs a side project for United Way Toronto & York Region, I worked with two Ryerson media production students to develop a website for the launch of their non-for-profit multi-media project, United City. The website is a fully interactive map-based website with short video, audio and transcribed interviews of youth (16-25) dealing with poverty and other social issues.
